

FIND YOUR PASSION

workbook

"The only way to do great work is to love what you do. If you haven't found it yet, keep looking.

Don't settle."

- Steve Jobs

why passion matters?

Imagine this: You wake up every morning feeling excited, not just for the weekend, but for the whole day! You get to do things you really enjoy, learn new things that make your brain happy, and maybe even help others along the way. That's the power of finding your passion. It's like finding your own special happy place in the world.

Why Does It Matter?

Why is finding something you really love to do so important? Because when you do something you're passionate about, it doesn't feel like work! It feels more like playing a fun game or doing your favorite hobby. You might even lose track of time because you're having so much fun learning and creating. A job you love makes you feel good, which makes life more enjoyable overall.

Following the Curiosity Clues

Have you ever gotten stuck on a cool fact you saw online? Or maybe you can't stop thinking about a mystery you want to solve? Those are your "curiosity clues"! They're like little hints from your brain about things you might be really interested in learning more about. Following these clues can lead you on exciting adventures, just like finding a hidden treasure chest full of cool stuff!

How to Use This Workbook

- **Take Your Time:** Finding your passion is a process. Don't rush through the exercises.
- **Be Honest:** Reflect deeply and write down your true thoughts and feelings.
- **Stay Open:** Allow yourself to dream and explore without judgment.

Thank you for taking this important step toward finding what truly excites you. Your passion is waiting—let's start this journey together! Be patient and kind to yourself. Finding your passion is not about getting a quick answer; it's about understanding the different things that make you unique.
